Q4 2025 Revenue Decline Analysis

Dataset: E-commerce orders · Generated: 2026-11-07 00:03 UTC

Question

Why did our revenue decline last quarter, and which customer segments contributed most?

Executive summary

Revenue fell 15.47% (■146,440.54) in Q4 2025 compared with Q3 2025. The Enterprise customer segment drove the bulk of the drop, accounting for 59.5% of the total decline with revenue down 22.01% (■87,116.11). Higher average discounts across all segments and a 13.41% reduction in quantity sold for Enterprise further explain the downturn.

Scope & task alignment

Scope	Value
Current period	Q4 2025
Comparison period	Q3 2025
Metric	revenue
Grouping	customer_segment
Task alignment	ALIGNED

Assumption: Periods are relative to the data, which covers 2024-01-01 to 2025-12-31 in 'order_date', not to today's date.

Assumption: The data reaches the end of Q4 2025 (2025-12-31), so it is the most recent complete quarter and is used as 'last quarter'.

Assumption: Comparison period: Q3 2025 (the preceding period).

Run metric	Value

Findings

1. Overall revenue decline [VERIFIED]

Total revenue decreased by 15.47% (■146,440.54) from Q3 2025 (946,659.27) to Q4 2025 (800,218.73).

Numbers checked: 4/4 matched tool outputs. Evidence: E1

2. Enterprise segment leads revenue drop [VERIFIED]

Enterprise revenue fell 22.01% (■87,116.11), representing 59.49% of the total revenue decline.

Numbers checked: 3/3 matched tool outputs. Evidence: E1

3. Discounts increased across segments [VERIFIED]

Average discount for Enterprise rose from 0.08283 in Q3 to 0.1139 in Q4, a 37.5% increase.

Numbers checked: 3/3 matched tool outputs. Evidence: E3

4. Quantity sold declined, especially for Enterprise [VERIFIED]

Enterprise quantity dropped 13.41% (■410 units), contributing 55.71% of the overall quantity decline.

Numbers checked: 3/3 matched tool outputs. Evidence: E2

Auto-generated fallback chart: the agent did not create a chart.

Limitations & caveats

• Data only covers up to 2025-12-31; later trends are unavailable.

• Analysis is based on aggregated metrics; it does not capture individual order nuances.

• Causal inference is limited; higher discounts and lower quantities are correlated with revenue decline but may not be the sole drivers.
